Tools & Technologies

- Power BI • Power Query • Excel (Advanced + VBA) • SQL • Python (Visualization) DAX • MS Office Suite • Basic R

Professional Strengths

- Strong stakeholder engagement
- Training & team capacity building
- High attention to detail
- Process optimization & documentation

RELEVANT EXPERIENCE

Data Analytics Lead
Kenya Builders & Concrete Co. Ltd.**Jan 2026- Date**

- Lead the development of standardized KPI frameworks, finance dashboards, and management reporting tools used across finance and operations to improve visibility and decision-making.
- Build and maintain budgeting, forecasting, and scenario-planning models, supporting month-end reviews, reforecasts, and performance analysis across key business drivers.
- Reconcile and analyze financial and operational data from multiple sources, identify inconsistencies, and work with stakeholders to improve reporting accuracy and data quality.
- Develop reporting automation and AI-assisted workflows that reduce manual effort, improve turnaround times, and strengthen consistency in recurring finance and performance reporting.
- Partner with cross-functional teams to document reporting needs, refine data definitions, and support adoption of improved analytics and reporting processes.
- Prepare and present board and stakeholder dashboards, translating complex data into clear, actionable insights for senior leadership.

Data Analytics Coordinator
Kenya Builders & Concrete Co. Ltd.**June 2022- Dec 2025**

- Produced recurring financial and operational reports that strengthened budget control, performance tracking, and management visibility over key metrics.
- Designed improved data collection and validation workflows that increased data accuracy by 30 percent and reduced reporting discrepancies by 25 percent.
- Built automated dashboards and reporting tools that reduced manual reporting time by over 40 percent and improved consistency of reporting outputs.
- Consolidated and reconciled information from multiple data sources to improve analytical completeness and reporting reliability.
- Supported forecasting, trend analysis, cost-benefit analysis, and executive reporting to enable better planning and performance management.
- Collaborated with business users to identify reporting needs, troubleshoot issues, and improve adoption of data tools and dashboards.

EDUCATION & CERTIFICATIONS

- **Chartered Financial Analyst (CFA) Charterholder**, (2022-2025)
- **Data Visualization with Python**, Moringa School (2023)
- **Power BI Training**, Kenya Association of Manufacturers (2023)
- **Bachelor of Economics & Sociology**, Egerton University (2014 – 2018)
